Electromotoric actuators for valves

SAX..

Actuators with 20 mm stroke and 800 N force

- SAX31.. Operating voltage AC 230 V, 3-position control signal
- SAX61.. Operating voltage AC/DC 24 V, positioning signal 0...10V, 4...20 mA
  With position feedback, forced control, characteristic changeover
- SAX61../MO operating voltage AC/DC 24 V,
  RS-485 for Modbus RTU communication
- SAX81.. Operating voltage AC/DC 24 V, 3-position control signal
- For direct mounting on valves; no adjustments required
- Manual adjuster, position and status indication (LED)
- Optional functions with auxiliary switches, potentiometer, function module, stem heating

Application

Electromotive actuators to operate Siemens 2-port and 3-port valves, types V..F21.., V..F22.., V..F31.., V..F32.., V..F40.., V..F41.., V..F42.., V..F52.., and V..F53.. with 20 mm stroke as control and safety shut-off valves in heating, ventilation and air conditioning systems.

Features

Function	Description	Type
3-position control	A 3-position signal controls the actuator via connection terminals Y1 or Y2. The desired position is transmitted to the valve.	SAX31.., SAX81..
Modulating control	The positioning signal range (DC 0...10 V / DC 4...20 mA / 0...1000 Ω) corresponds to the positioning range (closed...open, or 0...100% stroke) in a linear manner.	SAX61..
Positioning signal and characteristic changeover	Setting with DIL switch. Factory setting: ● Characteristic curve: log = Equal percentage (switch set to Off) ● Positioning signal: DC 0...10 V (switch set to Off)	
Position feedback U	Signal returned to acquire the position via input.	SAX61.., SAX61../MO
Forced control (Z-mode)	Forced control helps override automatic mode and is implemented via higher control.	
Calibration	Carry out during initial commissioning. The actuator drives to the top or bottom end position; the measured values are saved.	
Valve seat detection	The actuators have power-dependent seat detection. After calibration, the exact valve stroke is stored in the actuator's memory.	
Foreign body detection	After clogging is detected, three attempts are made to get past clogging. If unsuccessful, the actuator continues to follow the positioning signal only within a limited range, and the LED flashes red.	
Modbus RTU (RS-485), not galvanically isolated	Setpoint 0...100 % valve setting Actual value 0..100% for valve position Override control Open / Close / Min / Max / Stop Setpoint monitoring and backup mode	SAX61../MO

Notes

Safety

⚠ CAUTION

National safety regulations

Failure to comply with national safety regulations may result in personal injury and property damage.

● Observe national provisions and comply with the appropriate safety regulations.

	⚠ **WARNING**
⚠ (hot surface symbol)	**Risk of burns from hot actuator brackets**
	The actuator brackets on heating plants can also become hot from the contact with the hot valve during operation. The temperature of the actuator bracket can reach 100 °C.
	When servicing the actuator:
	• Switch off both pump and operating voltage.
	• Close the main shutoff valve in the piping.
	• Allow the piping to cool off.

Engineering

SAX31.. / SAX81..

3-position actuators must be controlled by a controller, see Internal diagrams [▶ 14].

SAX61..

Up to 10 actuators can drive in parallel on a controller output with a rating of 1 mA. Modulating actuators have an input impedance of 100 kΩ.

SAX61../MO

The Modbus converter is designed for analog control at 0...10 V.

ℹ	Keep the analog signal setting on the actuator as is (switch 1 to OFF); adjustment not permitted.

The actuators are factory configured for equal-percentage characteristic.

ℹ	DIL switch (internal actuator characteristic changeover) to "log" (switch 2 to "OFF").

ASZ7.5

Actuators with a DC 0...9.8 V feedback signal are recommended for the combination SIMATIC S5/S7 and position feedback.

Signal peaks in potentiometer ASZ7.5 may result in error messages on Siemens SIMATIC. This is not the cause, however, when combined with Siemens HVAC controllers. The reason is the higher resolution and faster reaction time on SIMATIC.

Use the potentiometer as voltage divider on the 3-wire connection. Powering the potentiometer over the wiper may shorten the life cycle of the potentiometer. Signal peaks increase in frequency and scope over the lifespan in this operating mode.

Mounting positions

Indoor application	Outdoor application [1] [2]
[1] Requires weather shield ASK39.1 Housing protection class remains IP 54.

[2] SAX61../MO is not intended for outdoor use.

Maintenance

The actuators are maintenance-free.

Disposal

	This symbol or any other national label indicate that the product, its packaging, and, where applicable, any batteries may not be disposed of as domestic waste. Delete all personal data and dispose of the item(s) at separate collection and recycling facilities in accordance with local and national legislation. For additional details, refer to Siemens information on disposal.

Warranty

The application-specific technical data is guaranteed only in combination with the Siemens products listed in the 'Device combinations' section. If third-party products are used, any guarantee provided by Siemens will be invalidated.
